Doodle-Track Cars

(Daydream Toy Company \$15 Score:

)
Wait till you try these amazing little vehicles that will follow any dark line you draw! These Doodle-Track vehicles are truly magical! Bring home a blue or red sports car. Small enough to fit in your hand, yet these are loaded with play power. Each vehicle comes with it's own set of

colorful stickers, a thick black marker and a small pre-drawn track. The little vehicles have an optical sensor that will follow lines drawn by a thick washable marker or crayon. The company also plans to make tracks with signs and seasonal decorative themes available on line that kids can download and print out at www.doodletrackcar.com. This is a wonderfully open-ended toy that allows kids to dream up new ways of playing. Add original tracks into block settings or create your own raceway for multiple Doodle-Track vehicles to run. This comes under the heading of many good things come in small packages! Requires 2 AAA batteries. Marked 4 & up. We think this will be enjoyed by older kids as well...not to mention their parents. The company has signed a verification form complying with our safety requirements. We did not independently test this toy in a lab.

Age: Preschool, Early School Years. Award Year: 2009. Click [here](#) to purchase the product on Amazon.com.
